Osborne Organics

“The need for qualified organic lawn care practitioners has never been greater..”

The Systems Approach to Natural Turf Management™ developed by Osborne Organics is fundamentally different from the conventional product approach.

We are offering this accredited training to teach the protocols, practices, and procedures of natural lawn care, so you, the land care professional, can fill an important need in the industry, and position yourself to capture a share of this growing market.

The knowledge of natural lawn care practices will enable you to build an organic lawn care business, create a new profit center in an existing business, and respond to increasing requests for chemical free and synthetic-free lawn care.

Become an Organic Lawn Care Accredited Professional (OLCAP)

Upon completion of the course you will have the option to test for your designation as an Organic Land Care Accredited Professional. You can then add the OLC-AP designation to your professional credentials and marketing materials.

Training from the Industry Leader

*Chip Osborne
President / Head of Training
Osborne Organics, LLC*

About Chip Osborne

Chip Osborne is one of the country's leading experts on growing sustainable, natural turf.

Chip is the president of Osborne Organics, LLC, a company he founded to support and educate the land care industry and public sector in alternative approaches to turf management. Chip's natural strategies blend science with hands on experience to create safe, sustainable, and healthy athletic fields and landscapes that do not involve the use of synthetic pesticides and chemical based fertilizers.

As a national consultant, Chip works with state agencies, municipalities, universities and nonprofit organizations in the areas of organic turf management and pesticide elimination.

Industry Experience

- Lecturer for the Northeast Organic Farming Association
- Board Member of Beyond Pesticides
- Chairman of the Marblehead, Massachusetts' Recreation and Parks Department
- Co-founded The Living Lawn Project in Marblehead, MA
- National Seminars Providing Education to the Landscape and Lawn Care Industry
- Professional horticulturalist with over 40 years experience in the green industry

The Systems Approach To Natural Turf Management™

What People Are Saying

"Chip's vast knowledge of soil biology, his understanding and mastery of natural lawn care techniques, and his many years of hands-on experience in turf maintenance and greenhouse growing make him an ideal instructor, and we have always received rave reviews for his courses."

**-Doug Wood, Associate Director
Grassroots Environmental Education**

"... His systems approach to turf management provided a framework that allowed me to quickly adopt natural turf management strategies in my existing landscape business, and then launch a new venture focused entirely on organic lawn care. I highly recommend his training to anyone interested in becoming an organic lawn care accredited professional."

**-Britt Phillips, Owner
Complete Land Organics, LLC**

"...Valuable, practical, thought provoking information backed up by years of documented results and is taught in a highly effective manner by an industry leader who is both passionate and extremely knowledgeable of his subject matter. The Rose Fitzgerald Kennedy Greenway Conservancy has confidently chosen to rely on Chip's teachings to help guide our landscape maintenance practices."

**-Anthony Ruggiero, Horticultural Foreman/Organic Program Manager
Rose Fitzgerald Kennedy Greenway Conservancy**

"Chip Osborne is our 'go-to' trainer for all of our natural lawn care training needs. He not only brings a wealth of knowledge of experience to his presentations, he is passionate and the ideal trainer for all types of audiences..."

**-Rachel Rosenberg, former Executive Director
Safer Pest Control Project now Midwest Pesticide Action Center**

The Systems Approach To Natural Turf Management™

What You Will Learn

In this two day training program you will learn the critical aspects of lawn care, turfgrass culture, and maintenance from an organic perspective and gain competency in the three core concepts of natural turf management:

1. The use of natural, organic products as dictated by soil testing.
2. An understanding of the soil and its biomass.
3. Sound cultural practices.

Topics Covered

- The history of conventional turf management practices and how a natural organic system approach differs.
- What is a systems approach?
- Soil and the soil biomass
- Soil tests, managing soil fertility, turfgrass nutrition
- pH Adjustments if needed, soil amendments, product rates and calculations
- Insects and fungal diseases of turf and appropriate control products
- Turf weeds, control products, and strategies
- Choosing the right grass
- Revised horticultural practices
- Mowing, cultivation, irrigation, and over seeding
- Compost and topdressing
- Managing the transition period

Exam Information

An exam will be delivered online following the completion of the event. A passing grade of 80% will be required to receive the Organic Lawn Care Accredited Professional designation. The examination fee is \$100. Candidates that do not pass the exam can retake it for a fee of \$50.
